IMPACT

INTERIOR AND EXTERIOR

A material made with a base and mortars —a mix of technical cements, silicas, calcium carbonate, micas and lightening and fire-retardant additives— that make Impact® an extra high-quality material. It stands out for its strength, adhesion and impermeability, and for standing up to the outdoors, to fire and to all kinds of weather, with high resistance to abrasion and chemicals. Its light weight and minimal thickness make fitting very straightforward. Suitable for interiors and exteriors.

APPLICATION

04 Installation

INSTALLATION

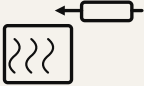

Fitting the Line 30x5 tile is quick and straightforward: **in just 3 steps, with no building work**. Apply bonding filler to the back of the piece and press it against the wall or façade, indoors or out, or fit it onto furniture and decorative features.

1

Pick up the tile

Choose the piece and get it ready to fit.

2

Apply the adhesive compound

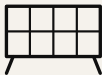

Apply the compound to the back.

3

Fit it to the wall or façade

Press each piece onto the surface.

+

Or clad furniture

Also onto furniture and decorative features.

FITTING ACCESSORIES

MSA-3 · Bonding filler

1 cartridge / several tiles

MSA-70 · Joint filler (optional)

to grout between pieces

No building work

no chasing or bricklaying required
